LICENSING & CERTIFICATIONS

Licensed low voltage technicians

Alarm, CCTV and structured cabling trades

Fiber splicing and OTDR testing

Add certifications here (e.g. BICSI, CompTIA, OSHA 10/30)

WHO WE SERVE

- National brands
- Retail & multi-site brands
- General contractors
- Data centers & enterprise IT

COVERAGE

All 50 states — local technicians plus traveling crews for remote and long-duration projects.

COMPANY OVERVIEW

Data Frog USA designs, installs and supports the networks businesses run on. Built on years of hands-on low voltage contracting, we deliver structured cabling, fiber, alarm, camera and point-of-sale work through a national network of licensed technicians, and back every install with network, cybersecurity, cloud, managed IT and service desk support. Our clients get one point of contact, techs who show up on time, and a documented closeout on every job.

CORE COMPETENCIES

■ Structured cabling & fiber

Copper (Cat6/Cat6A) and fiber design, installation, splicing, OTDR and certification testing; IDF/MDF build-outs.

■ Network design & installation

LAN/WAN, Wi-Fi, switching, routing and firewall deployment, site surveys and refreshes.

■ Cybersecurity & cloud solutions

Firewall and endpoint hardening, secure remote access, backup and continuity; cloud migration and Microsoft 365 / Google Workspace.

■ Managed IT & service desk

Proactive monitoring, patching and asset tracking; help desk with on-site dispatch when remote can't fix it.

■ Security & retail field services

Alarm and camera installation and service; POS installs, multi-site rollouts, store opens and remodels.

■ Data center & AI infrastructure

High-density cabling and traveling crews for new builds and expansions.

TRACK RECORD

Nationwide point-of-sale system installations and multi-site retail rollouts · Structured wiring projects · Alarm installation and service programs with licensed technicians deployed across the U.S.

WHY DATA FROG USA

One call, every site

A single point of contact from the first site to the last closeout.

Coverage without overhead

Local techs where you need them, traveling crews where you don't have them.

Proof on every job

Photos, signed work orders and notes come back with every visit.

Install and support, one team

Field work and ongoing IT support from the same company.

Terminated. Labeled. Tested.
